The installer will automatically install the program. When done Select **Yes**, I want to restart my computer now and click **Finish** to reboot your computer.

	InstallShield Wizard Complete The InstallShield Wizard has successfully installed FEALTEK 11n USB Wieless LAN Driver and Unity. Before you can use the program, you must restart your computer of Mes, I want to restart my computer now. No.1 will restart my computer later. Remove any disks from their drives, and then click Finish to complete setup.
-	

With the computer now turned on, insert the Wireless-G USB Adapter into an open USB 2.0 port.

With the Welcome to the Found New Hardware Wizard screen displayed (which is

automatic when the adapter is connected to the. computer), select the option "No, not this time" and click "Next".

	Welcome to the Found New Hardware Wizard Windows will eserch for current and updated software by boking on your computer, on the handware installation CD, or on the Windows Update Web site (with your permission). Read our privacy policy Can Windows connect to Windows Update to search for software? © Yes, this time only O Yes, now and givery time I connect a device
1	© No. nd this pine) Dick Next to continue.

When prompted with "What do you want the wizard to do?" seslect "Install the software automatically (Recommended)" and click "**Next**".

A status screen will display, indicating that the installation is in progress. No action is needed at this point.

When the Completing the Found New Hardware Wizard screen displays, it indicates that the installation ha been successfully completed and your Wireless-G USB Adapter is ready for configuration.

Configuration

Once the installation is complete, you can configure the Wireless-G USB Adapter to connect to a wireless access point(AP). The wireless configuration utility will start automatically, and you'll also find a tray icon at the lower right in your Windows systems tray.

1. Right-click the Wireless tray icon and select "Open Config Utility."

2. The configuration utility will scan for wireless networks within range. Click "Refresh" to refresh the list of available wireless networks. To join a Particular network that displays, select it and click "Add to Profile."
